## Software Requirements Specifications

### Document Purpose and Audience

- This document is a simple problem statement for an online shopping website Goods.com that show software requirements of our web site.
- Audience of this document are: users, Software manager, web developers, web designers.

### Introduction

#### Software Purpose

- To make exchange of goods with each other easier than traditional ways , anyone have goods he don't need anymore, Now he can sell it without the cost of ads.
- Also people can buy anything they need through this software and they can exchange their goods with other people in anywhere.
- That's what we want to do with our software. To make buying, selling and exchanging easily for customers.

#### Software Scope

- This website is like a big online Exhibition.
- You can browse and see the good for other which they would like to sell and you like to buy.
- Also you can put the things which you would like to sell
- Also you can exchange good with other people
- And this website can be useful for a lot of people because:
  - There are a lot of category of goods which is suitable for people.
  - This website save money of advertisement in journal or in media.
  - It is easy to contact.

#### Definitions, acronyms, and abbreviations

- Good.com : is The project name.
- Goods.com is sample web site that can online shopping very easy from your home, you and review your items, buy or sell and also you can exchange items with others.

CS251: Phase 1 – Team Wishes, Proj Goods.com

## Software Requirements Specifications
